MINING, BUSINESS AND STOCKS

FORENOON ON THE EXCHANGE.

Lower Mammeth Supplied the Feature of Today's Early Calls.

UNCLE SAM IN GOOD ORDER.

New York Bonanza Remained Firm --Carlsa Held Its Own-Closing Quotations and Sa'es.

Brokers wanted Lower Mammoth today and that stock furnished the feature for the forenoon trading on the floor of the Salt Lake Stock & Mining Exchange. While the price did not reach the high point of last week, steady gains were made during regular call, followed by a slight reaction on the open board. Consolidated Mercur was bought at 55 cents, but there was not much demand for it.

Ajax came out at 16 cents, while Sacramento fell off a quarter of a cent a share. The encouraging conditions at the Uncle Sam mine have given that stock an attractiveness and it was bought around 42 cents. Develop-ments on the 500 level have never been more promising than at the present time. New York Bonsuza held firm, as did Carisa, while the best that May Day could do was the sale of 2,000 shares at 71/2 crots.

The closing quotations and sales

ONTARIO TUNNEL.

The Campaign Being Carried on to

By kind permission of Foreman Matt Connelley, whose name has been synonlinous with the Ontario company for

Connelley, whose name has been synonimous with the Ontario company for 20 years past, and piloted by John Scalion, the veteran shift boss of the mine, a Park City Record reporter was given a trip through 11,000 feet of the famous three-mill drain tunnel last week. At the 11,000-foot point, the air became so bad as to cause dizziness, and it was necessary to return to the mouth. At a distance of 9,000 feet in the tunnel candles cannot burn on account of the foul air, but this is being remedied as fast as the air pipes can be laid. Two lines of pipe are being put in, one from the compressor and the other from the blower. On Wednesday workmen were employed at the 4,500-foot mark, finishing up the timb-ring of the big cave found there. This cave, the fifth one so far encountered, was about 30 feet long, and has been taken up in excellent shape. This is the last cave encountered, and as far as it has been possible to go, over 11,000 feet, no others have been found. Though no definite statement can be made, as it is merely a matter of supposition, Mr. Connelley is of the opinion cave, which he believes to be the last one, is at about the 13,000-foot mark. All haste is being made to reach it wherever it is, and to say the least, the prospects of having the tunnel open again in a few weeks' time are most encouraging. Two small compressors are now working night and day, but these have been found not sufficient to furnish the necessary air, and consequently a new and larger machine has been purchased in Salt Lake and will be put in place next week. The tunnel is now in first-class condition as far as has been gone, the caves being taken up in a substantial manner, eliminating all danger of the ground caving again. Foreman Connelley will take every precaution for the safety of his men as they go farther into the tunnel and will have trollies on hand at all times for cases of emergency which might possibly result from had, it. The feet blocks of the elec-

into the tunnel and will have trollies on hand at all times for cases of emergency which might possibly result from bad air. The fuse blocks of the electric moters, etc., in use at the tunnel mouth are being placed on the outside of the buildings to prevent a possibility of fire from this souce. About one-third of the regular volue of water is now coming through the tunnel.

The Ontario management has worked

coming through the tunnel.

The Ontario management has worked faithfully and hard, in the face of many obstacles, to overcome the obstructions in the tunnel, and have left nothing undone to get it open, and judging from present indications its efforts will soon be crowned with success, which is the earnest wish of every

THE CRESCENT DISTRICT. It May Develop Into Another Searchlight Camp.

The Crescent district, or, as it is more familiarly known in Las Vegas, Nippeno, from my observation of the district, is destined to become another district, is destined to become another Searchlight, says a writer for the Las Vezas Times. The character of the formation, the dips of the ledges; their size and apparent stability compare exactly with the general formation of Eldorado and Searchlight and when it is taken into consideration the as yet unexplored that that lies between Searchlight and the Crescent range, about 18 miles in width there is every about 18 miles in width, there is every indication to believe that the mineral belt of the Crescent is a continuation of the wonderful belt that has made

of the wonderful belt that has made Searchlight famous.

There is no doubt that the Crescent district is not a poor man's country, but the surface shows up much, richer than did the ore on the mines of its sister across the valley. The Quartet shows asseys of from 85 cents to \$1.25 on the surface, and it was not until the 200 foot level was struck that pay dirt enough was encountered to warrant a mill. Today you couldn't buy that mine for \$10,000,000, and if there is a single share of its stock on the market

mine for \$10,000,000, and If there is a single share of its stock on the market it is a maverick and should be branded.

The strike at the Lucky Dutchman is a reality and while not much work has been done as yet, the richness of its surface showing leads to believe that it will develop into a valuable mine. will develop into a valuable mine. Among the other properties is the mine of C. H. Sheerer, who recently refused \$75,000 in cash for the property and in talking to the old gentlemen concerning the offer, he said: "Well, I can see that much in sight and if it is worth much to the parties, it is worth more to me." His is one of the best developed prospects in the district and banders on the new town. Forenoon totals 19,282,% \$7,112.00 orders on the new town.

ATTORNEYS, NOTARIES and real estate men will find a full supply of legal blanks at the Desert News Rook

INJUNCTION IS

United States Mining Company Will Commence Ore Extraction From Kempton Lode Claim.

JUDGE MARSHALL MADE ORDER

Property is Valued at from \$1,500,000 To \$2,000.000 -- One Hope for the Vanquished Left.

There now seems to be nothing in the way of the United States Mining company from proceeding with the mining and extraction of ore from the Kempton lode miring claim in Bingham, which has a purported value of anywhere from \$1,500,000 to \$2,000,000. In the federal court this morning, Judge Marshall dissolved the injunction in the case of the Ivanhoe Mining company et al. vs. the United States Mining company, which had been previously entered, and which prevented the defendant company from entering the Kempton claim for the purpose of taking out ore. The order made by Judge Marshall today was done on application of the attorneys of the United States Mining company, who contended that it was clear to them that title to the ground had been clearly established, in-agmuch as at least two justices of the United States supreme court had de-nied the application made to them for an appeal from the United, States cir-cuit court of appeals, before which tribunal the matter was tried in St. Louis.

tribunal the matter was tried in St. Louis.

With the exception in the result in the lower court, the United States Mining company has won every single point in the controversy. Col. Enos A. Wall is the principal loser in the case, which has cost no small fortune to litigate. But it has been fought bitterly from the beginning. It is being carried to the last ditch and the only hope left for Col. Wall and associates, is some favorable action in the application for a writ of certeraori, now pending before the highest legal tribunal in the land.

Upon disr issal of the injunction, Superintendent Andrew Mayberry, in charge of the U. S. company's Bingham mines, was given instructions to put a force of men to work there.

THE BINGHAM CON. Engle & Blue Bell Mine Acquisition Has

Proved to be a Good One. The Boston Commercial says Bingham Consolidated's increasing strength is understood to be due to conditions brought about by the development of the company's Eagle & Blue Bell mine, which adjoins the Centennial-Eureka of the U.S. Mining company. The Bingham bought 190,000 shares out of a total of 250,000 shares of this company's stock for \$250,000.

pany's stock for \$250,000.

Under Bingham management a shaft has been sunk 1,000 feet. At the eighth level a crosscut was extended to the vein and a drift 200 feet long is in ore that averages \$20. A crosscut is being extended from the 1,000-foot level, and if the ore body is as extensive and rich at this lower point it is estimated it will make the mine worth \$1,250,000 to \$2,000,000.

Developments in the Dalton & Lark properties continue to show satisfactory results. One splendid vein of silver-lead ore is being opened up, which averages approximately \$25.

The Bingham has been getting more or less unsatisfactory results from its

or less unsatisfactory results from its smelter. The Bingham secured a two-

smelter. The Bingham secured a two-year contract to smelt concentrates of the Utah Copper company and the Newhouse mines. These concentrates have proved so very fine that they have been handled with difficulty, an increased amount of flue dust and greater losses resulting. Changes have been made in the flue chambers and briquetting machines have been installed. It is understood that the Bingham will shortly erect roasters at its mines and partly reduce its sulphide ores before shipping them to the smelter, and also that it will to the smelter, and also that it will build a reverberatory furnace in which it will matte the finer portion of

The Bingham company's mines never looked nearly as well before. It is therefore unfortunate that its smelter must be kept at work on contracts that return unsatisfactory profits.

BIG OIL SHIPMENT.

Pittsburg-Salt Lake Company to Soud Out Five Car Loads.

Special Correspondence. Evanston, Wyo., July 24.—A shipment of five cars of high grade oil will be made from the wells of the Pittsburg-Salt Lake company to the Florence, Colo., refineries this week. This is die first large shipment ever made from the Unita county fields. The oil is the highest grade illuminant ever found anywhere in the world. Regular ship-

The western offices of this cornainy are located at Salt Lake and tas manager is A. V. Taylor of that place.

COAL AT BASIN. New Discovery Reported on Big Horn River in Wyoming.

Special Correspondence,
Basin, Wyo., July 22.—Considerable excitement has been created here by the discovery of large veins of high grade coal in the hills on the east side of the Big Horn river. Tests show that in addition to the coal being of very high grade, petroleum is to be found in pay-ing quantities in the same vicinity. Ground is being staked rapidly.

Uncle Sam Looks Good.

Supt. Griggs of the Uncle Sam Con nine of Tintic this morning telephoned to local officials of the company that the 500 level of that property has never looked quite so good to him as at the present time.

CONCENTRATES.

Scorpion 1 10

David Evans has returned from Charenea K. McCornick expects to leave for Los Angeles on an early train.

Manager Henry Catrow of the Ohio Copper company is at Brighton with his family,

The new hoisting plant of the Silver King consolidated is scheduled to go into commission teday, The operation of the Hancock gig at the Cactus concentrator at Newhouse

is said to be a success. John A. Kirby, recently chosen manager of the Montana Tonopah mine at Tonopah will leave for his post of duty next Saturday.

There will be a meeting of the directors of the Utah Copper company in Colorado Springs tomorrow. Manager

Jackling will be present. John W. Langley, a former member of the Sait Lake stock and Mining Ex-change, but who has become establish-ed in business at Tonopah, is in the

A. Chester Beatty, who has had charge of the sampling of the Utah copper mine at Bingham for the American Securities company, has departed for Denver.

A. R. Shorter, mayor of the city of Miamisburg, Ohio, is in the city and will look over the mines of Bingham before returning.—He is a shareholder in the Ohio Copper company.

Manager Tony Jacobson of the Co lumbus Con. mine of Alta expects to leave for Los Angeles tomorrow. He will bring his family, which has been at Long Beach for several weeks, home with him.

for the purchase of the control of the stock of the Utah Copper company by the American Securities company, will be closed in a very short time, and that work on the proposed concentrator will be inaugurated soon.

A concentrating plant with a capacity of 1,000 tons daily is planned by the Nevada Consolidated Copper company Nevada Consolidated Copper company at Ely, Nevada. The company's head office is in Boston. It has \$1,300,000 shares, par value \$5. This was recently increased from 1,000,000 shares, 200,000 shares to be used in acquiring a 150-mile railroad connection with the Southern Pacific and 100,000 shares to be held in the transport for future additional contents. be held in the treasury for future additions and improvements. The officers are: James Phillips, Jr., president; Homer Loring, Vice president, and George B. Beals, secretary and treas-

Fire Causes a Panic.

Chicago, July 25,-Fire in the building at 6236 Canal street, caused a scare among the guests of the Grand Central hote; at Madison and Clinton streets last night. Many women ran screaming through the corridors of the hotel, But they were quieted by men in the hotel before an yone was burt. The building on Canal street was destroyed. The contents were distributed among about 15 small firms, most of which dealt in small machinery and novelties. One fireman was seriously injured by falling from a fire escape.

VERY UNSETTLED

Opened a Little Higher, Demand Became Languid, and Then Slipped Back.

AND WENT LOWER STILL.

Railroads Went Below Last Night's Close, Pacifics Losing Large Fractions.

New York, July 25.-Prices opened a shade higher with the exception of 1 or 2 eastern railroad stocks and specialties, The early demand was funguid and prices slipped back to last night's level, but an aggressive advance of 14 in Reading restored the higher level in sympathy. The market was narrow and professional. American Express fell 5 on one sale. The buying was not pursued and prices dropped again. Colorado Fuel, after advancing 1, reacted 14. Great Northern preferred and Northern Pacific advanced 15, but the market was only nominal and long abtervals came between transactions Steel Foundries preferred fell 1% and

Steel Foundries preferred fell 1½ and Pittsburg Cosl preferred 2.

Bonds were steady at hoon. Prices ragged on light dealings during the noon hour so that Reading lost its gain and others that had been strong nearly so. Some railroad stocks fell a fraction below last night.

After a period of hesitation prices went lower. United States Steel stocks and Amsignameted Copper lost their advances and railroad stocks generally fell below last night, including Reading. The declines in the Pacifics extended to large fractions. Chicago Terminal preferred and National Biscuit rose 1. Central Leather fell 1 and Allis-Chalmers preferred 2.

The market was extremely nervous the entire session. Buillish advices from the northwest sent September up to 85%, Later the greater part of the gain was loated to the report damage by rust to the wheat crop of the Dakotas and Minnessta is immaterial. The market closed weak with September down %4½ at 86½ 75.

PRODUCK. CHICAGO.

CHICAGO.

Chicago. July 25—Clear weather in the northwest caused renewed liquidation in the wheat pit here today resulting in a weak market. Other factors were lower cables liberal receipts and a further decline at Minneapolis. September opened in to 1 cent lower at 83% to 85%. An official forecast of showers for the spring wheat territory brought out sufficient demand to cause a raily for September to 57%. Minneapolis, Duluth and Chicago reported receipts of 669 cars against 400 a year ago.

A firm tone prevailed in the corn pit. September opened unchanged to 14 higher at 14% to 54% and sold up to 54%44%. Sentiment in oats was bearish. September opened 4 lower at 25% and sold at 2914025%.

Apprehension concerning the yellow fever situation caused an easier tone in the provision market. September pork was off 71% at 12.35; lard was down a shade at 7.1719.

1.125. and ribs were a shade higher at 1.813s.

Corn—September declined to 14%, closing casy, 1,42% lower at 13%,40549.

PIONEER UNDERTAKER

Use Hoffman's Hair Tonic

Baldness may often be cured and always prevented. . If the hair follicles are not entirely destroyed, Hoffman's Hair Tonic will cover that bald spot, with a luxurient growth. It contains no grease, and does not effect the natural color of the hair. It is non-irritant, and strictly anticeptic, and is a SURE destroyer

Money Back If It Falls. DON'T JUDGE the relative merits of various hair tonics by the size, or the quantity, or the quality of the advertising. Give Hoffman's Hair Tonic a trial before abandoning hope. The results are marvelous—the most skeptical are delighted. Hundreds of unsolicited testimonials are on file at our office—each and every one a convincing proof that Hoffman's Hair Tonic does in fact, what all other hair tonics profess to do.
